

# BE A HERO HELP YOUR PATIENTS DO THE RIGHT THING

## THE CONSUMER DRUG TAKE-BACK PROGRAM MAKES IT EASY

This in-store solution enables everyone in your community to quickly and easily dispose of surplus and expired medications - any time they visit your location - just by dropping them in the secured receptacle.

### PROGRAM INCLUDES:

- Receptacle, collection and shipping supplies for monthly returns with prepaid shipping labels and destruction
- Marketing resources to promote your program
- Google Map search feature helps consumers find participating pharmacies

### PATIENT-FRIENDLY. SMALL FOOTPRINT. BIG RETURNS.

- Turn-key solution with all supplies included and no hidden fees
- Secure, ADA and DEA compliant disposal
- Drives increased foot traffic and prescription business
- Fosters trust and good faith with your community
- Provides environmental protection by reducing unwanted drug residue in water tables
- Receptacle is made in the USA

Ask us about our drug stewardship program for manufacturer-sponsored consumer drug take-back and how your facilities may be able to participate.

of misused prescription pain relievers are given by, bought from or taken from a friend or relative

**1 CHILD EVERY 10 MINUTES**  
is in the emergency room for medication poisoning

**46 MILLION AMERICANS**  
are exposed to trace amounts of pharmaceuticals in their drinking water

# CONSUMER DRUG TAKE-BACK PROGRAM TESTIMONIALS

## “ PRESCRIPTION SHOP IN ALPINE, TX

The program is more than we could have hoped for. Our patients are thankful for the opportunity to dispose of their drugs without question. We have people from all over this area bringing in their drugs whether it is due to a death, expires, or just no longer taking.

We have promoted the program. All of the doctors offices around town are aware as well as the school nurses who tend to have medications left over or expired. We would like to create a flyer to pass around to local businesses so that more people are aware that we do this all year long. We have a lot of non-customers using our service as well. Those that come in always let us know how grateful they are that we are doing this.

## “ BOWMAN'S MARKET PHARMACY IN KAYSVILLE, UT

We are very happy with the big green drug eating box! The patients have taken right to using it and we observe folks bring expired meds by many times each day. I have been told multiple times over the last several months that the patients appreciate being able to bring in their expired medications when they are picking up other prescriptions. They like not having to go to the police station or to the drug take-back sites. We also had a good response by teaching folks picking up narcotic prescriptions that are for acute use and telling them that when the medications are no longer needed, they can simply return them to the green box that is right behind them and they will be properly disposed of instead of sitting at home where they may be diverted.

After having it installed now since January, I cannot figure out why we have not had a similar program for the last 20 years that the pharmacy has existed. I cannot imagine having a pharmacy without the green box!

## “ UNIVERSITY OF MARYLAND

The response has been incredible. People began using it immediately. We are promoting it over the next month at a managers communication meeting. We are working on putting it in patient education.

## “ MOUNDSVILLE PHARMACY IN MOUNDSVILLE, WV

The Inmar Take-Back Program has been a great addition to the services offered at Moundsville Pharmacy! We have often interacted with patients who face the challenge of proper disposal of unused medications, and in particular, controlled substance medications. Many patients are just as concerned as pharmacists are about how to minimize the diversion of controlled substance medications. With the Inmar Take-Back Program, we now have the perfect solution to offer them!

We strive to be solution-oriented for our patients and community, and as such, offering this program continues to improve patient confidence in our team. Currently, promotion of our program is primarily achieved through staff interactions with patients. In the coming months, we plan to do more community-based marketing, especially with prescriber offices who are often fielding these types of questions and looking for solutions. The program has been simple to use – with detailed instructions, a safe and secure receptacle, and easy returns.

## “ STANLEYVILLE FAMILY PHARMACY IN WINSTON-SALEM, NC & PSA CLINIC PHARMACY IN SWANNANOVA, NC

Our patients have certainly appreciated the take back box. Many patients have cleaned out their medicine cabinets.

The program has been promoted by several local organizations and we have had non-customers stop by and utilize the drop box. Thank you so much for helping us with it!
