

Democratizing the healthcare system

Expand your pharmacy clinical services

At QuidelOrtho, we transform diagnostic data into answers, understanding and action, illuminating the path forward for all. For more than 80 years, we've pursued the unknown with a passion and purpose to improve health. And we'll continue to transform the power of diagnostics into a healthier future for all.

BRXXXXEN (11/23)

From simple and accurate OTC tests to rapid, high-volume analyzers that fit seamlessly into your workflow, QuidelOrtho offers a range of convenient and affordable diagnostic solutions to help you better care for all your customers. At home or at your pharmacy, we're here to help your customers and business stay healthy.

Test-to-Treat

In-store diagnostics and care

QuidelOrtho pharmacy test-to-treat programs enable you to offer customers the convenience of testing and prescriptions (if necessary) in a single visit at your store location. Our test-to-treat programs make diagnosing and treating common infectious diseases like COVID-19, flu, and strep more efficient, cost effective and accessible for customers, while giving your pharmacy more ways to create value and expand services.

Sofia[®] 2

Comprehensive,
accurate and
connected

A compact and powerful benchtop analyzer using proven lateral-flow technology and advanced fluorescence chemistry, Sofia 2 offers comprehensive testing for respiratory, Lyme and other common diseases.

Accurate and objective results are automatically reported on the easy-to-use touch screen in as few as three minutes with more than 20 failure-safe and failure-alert features for confidence in every test.

This small, sophisticated instrument fits easily into your workspace and workflow by integrating seamlessly into pharmacy management and EMR systems.

Virena[®]

Uniting healthcare providers

Virena is a wireless data management system that provides access to the entire network of connected Sofia 2 instruments for better quality control monitoring, inventory management and disease progression analysis.

Virena empowers on-board data management with the ability to store up to 1,000 tests (FIFO) to support your documentation requirements or provide a backup system to your current documentation protocols. Virena also enables Sofia 2 to interface with your EMR and LIS systems for automated result transmission, decreasing the risk of transcription errors with manual results entry.

Workflow Services

Streamlined, simple and turnkey

Together with Workflow Services by ImageMover, QuidelOrtho can offer a digitized pharmacy point-of-care workflow that streamlines your pharmacy's approach to testing and care. With ImageMover, there is minimal paper, scanning or data entry for your team. A simple, turn-key solution, ImageMover enables pharmacies to onboard new patients 80% faster than manual processes, reduces the chance of transcription error, and secures record keeping for audits. All of which gives your pharmacy team more time to focus on customers and patient care.

QuickVue®

Rapid testing and reliable results

For more than 40 years, healthcare professionals around the world have relied on QuickVue rapid lateral flow tests to diagnose and treat patients fast. Visually read with results in minutes, QuickVue Professional tests enable your pharmacy team to answer your customers' questions and concerns quickly and accurately.

The QuickVue testing platform is well-suited for the pharmacy environment and tests are available for a range of infectious disease, women's health and general health.

QuickVue® OTC

Clear, confident answers in minutes

The QuickVue At-Home OTC COVID-19 Test is highly accurate, fast and easy for consumers to use in the privacy of their own home. With simple test prep and rapid results, your customers can have complete confidence in their COVID-19 status while taking any necessary precautions to protect their families and loved ones.
